Tuong Mai, Hoang Mai, Hanoi

As a Full-Stack Developer and Information Systems student at Thuy Loi University, I specialize in building high-performance platforms using Next.js, React, Flutter, and FastAPI. With a strong passion for Data Mining, Machine Learning, and Cloud-Native architectures, I am eager to leverage my technical expertise and drive impactful solutions in innovative, real-world projects.

SKILLS

Frontend & Mobile	Next.js, React, Flutter, Tailwind CSS, Shadcn UI, HTML5
Backend API	FastAPI, Node.js, .NET Core (C#), Python
Cloud & DevOps	GCP (Google Cloud), Cloudflare, Docker, Serverless, Microservices
Databases	PostgreSQL, MySQL, SQL Server, Firebase, Redis
Tools & Workflows	Git, GitHub, GitLab, Postman, Trello, CI/CD Actions
Data & Others	Data Mining (K-Means, Random Forest), Machine Learning, RESTful API

WORK EXPERIENCE

Present Nov 2025	Full-Stack Developer Intern, CODE DREAM Co., LTD, Hanoi, Vietnam - Participated in the development of the Code Dream Center Management System as a core developer. - Built and maintained full-stack functional modules using React for the frontend and FastAPI for the backend. - Optimized source code, debugged UI/UX inconsistencies, and improved overall system performance using browser DevTools. ReactTailwind CSSAnt DesignFastAPIPostgreSQLSQL ServerMySQLFirebaseDocker
May 2026 Nov 2025	Undergraduate Researcher (NCKH), THUY LOI UNIVERSITY, Hanoi, Vietnam - Participated in the Student Scientific Research Competition, focusing on building a copyright protection system for online learning platforms. - Engineered a multi-layered security architecture integrating MPEG-CENC DRM and dynamic watermarking to prevent unauthorized video downloading and screen recording. - Researched and implemented real-time facial recognition using FaceNet and face-api.js on the client-side to continuously verify student identities and prevent account sharing. Next.js.NET CorePythonOpenCVMPEG-CENCFace-api.js
Aug 2025 Jun 2025	Undergraduate Researcher, THUY LOI UNIVERSITY IT LAB, Hanoi, Vietnam - Actively engaged in scientific research and practical academic projects under the supervision of university lecturers. - Applied Data Mining techniques (K-Means, Random Forest, Logistic Regression) using Python to build predictive models for academic research. - Researched and implemented modern system architectures, including Cloud-Native and Microservices. PythonScikit-learnPandasData MiningMachine Learning

EDUCATION

2023 - 2027 **Bachelor of Information Systems**, Thuy Loi University (TLU), Hanoi
Current GPA : 3.53/4.00 | Aiming for Excellent honors
Aiming for TOEIC (850 L&R, 300 S&W) by Nov 2026

LANGUAGES

Vietnamese ●●●●●
English ●●●●○

STRENGTHS

- Teamwork & Collaboration
- Leadership & Project Management
- Time Management
- Continuous Learning & Research

PROJECTS

E-LEARNING DRM SYSTEM (PROJECT LEADER, TEAM OF 3)

NOV 2025 - MAY 2026

[Video Demo](#)

Developed a robust DRM streaming protection system to prevent unauthorized video downloading and screen-recording piracy (99.9% risk reduction) via Dynamic Watermarking. Built a Python Computer Vision microservice (FaceID) with >98% accuracy to prevent account sharing. Developed a .NET Core backend and Next.js admin dashboard.

Next.js .NET Core (C#) Python OpenCV PostgreSQL GCP

CODE DREAM CENTER ERP & CRM (FULL-STACK DEVELOPER)

NOV 2025 - PRESENT

Source code & demo restricted due to company confidentiality

Built a comprehensive ERP & CRM system to streamline center operations, including client tracking, employee account management, and automated timekeeping/attendance. Optimized operational workflows, reducing manual scheduling time by 70%. Packaged consistent Docker environments for Development and Production. (*Confidential Enterprise Project*)

React FastAPI MYSQL Docker

CODE DREAM EXAM PLATFORM (FULL-STACK DEVELOPER)

2025 - 2026

[Live Demo](#)

Developed a high school Informatics exam preparation platform, resolving spike traffic to ensure smooth processing of >2,000 requests/sec. Engineered backend algorithms for dynamic exam matrix generation (automated question shuffling) in <100ms. Utilized Redis cache to reduce PostgreSQL load by 85% during peak submission times.

React FastAPI PostgreSQL Redis Docker

CLOUD-NATIVE FLASHCARD - VOCABFLOW (PROJECT LEADER, TEAM OF 5)

2025 - 2026

[Video Demo](#) [github.com/https://github.com/thanhtung111205/CuoiKiCloud](https://github.com/thanhtung111205/CuoiKiCloud)

Architected a Serverless Cloud-Native system with auto-scaling up to 1000+ instances on GCP Cloud Run (near \$0 operational cost). Optimized global page speed using Cloudflare Pages (TTFB < 45ms). Integrated OpenAI GPT-4o mini for dynamic context and vocabulary generation.

Next.js FastAPI Docker GCP Cloudflare Firebase Redis

STUDENT DEPRESSION RISK PREDICTION (ACADEMIC RESEARCH)

2026

Conducted a data mining research project to predict the risk of depression among university students. Built and evaluated predictive models applying classification and clustering algorithms (Naive Bayes, Random Forest, Logistic Regression, K-means) to identify high-risk psychological patterns.

Python Scikit-learn Pandas Data Mining Machine Learning
